Like civilization industries came from the East, and the orgin of different fabrics can be generally traced to one of the great seats of trade and manufacture in the Middle Ages. The great intellectual awakening of the East, under the stimulus of Arabic culture and luxuriance, was accomplished by a correspondent awakening in all branches of industry and trade. Bagdad, during the beneficent reign of Harun-ul-Rashid. became the seat of luxury and the intellectual and literary capital both of Islam and of the world. Thence the industrial and fine arts were transferred by Saracen and Moor, and Osmanli to the extremities of Europe. When Moslem industries began to wane they were succeeded by those of Flanders, and the latter were, in turn, succeeded by those of Northern Italy. These were the well-established centers of manufacture in mediaeval times. Other localities, such as many in France, Spain and England are well-known for their commercial activity, but they were not in a large sense origins of modern manufacture and trade. To the earliest of these industrial seats the Mohammedan empire, with Bagdad as the center, may be traced a large number of the fabrics now in use. This city, as has been seen, soon became the mart of silk manufacturers. It also attracted the commerce of other cities and countries, and served as a perpetual bazar or fair for the interchanging of trade between the East and West.

Muslin is a word that we get through the French "mousseline," which incates that the fabric was first made in Mosul, a city on the Tigris, not far from Bagdad; while "baudekin," the rich embroidered silk that was once used by kings and bishops, came from the royal city of califs itself. Gauze is supposed to have come from Gaza, and "sarcenet" clearly shows by its name that it was brought into Europe by the Saracenic invaders of Spain and Sicily. Cashmere, as it is called when worn by the ladies, or cassimere, as it is known when worn by men, was brought from the valley of Kashmir, and nankeen came from Nanking, the southern capital of China. Calico first came from Calicut, although it is now sold there by the enterprising British mills. The saracenic torch-bearers of science and the arts brought with them from Fostat, the old name of Cairo, and now a suburb of that city, the famous fustian that has played such a conspicuous part in the history of textile fabrics and in the language of metaphor. The Saracens also invented jeans, so named from the city of Jaen, one of the Moorish capitals in Spain. They also devised the glories of Cordovan leather, in which Miles Standish and a thousand other buckram warriors

The Door Spring.

Truly in no minor feature is the progress of civilization more apparent than in the present common use of the door spring. We don't shut doors now nearly as much as we used to; we don't stop to shut them. We are spared that trouble and we save time. We open the door and push on through and leave the door to take care of itself. In the time that it would have taken us to close it we are six, eight, ten feet off; but the door is not neglected; it shuts itself, calmly, quietly, and with certainty as the man marches away. There is less slamming of doors now than ever, and fewer doors are left open; and the saving of time effected by the use of the self-closing door is in the aggregate tremendous.

Do we Need Big Muscles?

By no means. Persons of herculean build frequently possess a minimum of genuine vigor, and exhibit less endurance than very small and exhibit less endurance than very small people. Real vigor means the ability to digest and sleep well, and to perform a reasonable amount of daily physical and mental labor without unnatural fatigue. It is because a course of Hostetter's Stomach Bitters enables the enfeebled dyspeptic to resume the allotted activity of every day life, as well as to participate without discomfort in its enjoyments, that it is such a pre-eminently useful medicine.

"I can't part with that," said the bald-headed man as he put the comb back in his pocket.

INCURABLE DISEASES.

THE LIST DECREASES AS THE KNOWL EDGE OF SCIENCE INCREASES.

Story of a Man Who Was Given Up to Die by Seven Physicians—He Fol-lows the Advice of a Friend and is Now a Well Man —A Wonderful Story.

From the Leader, Morrisville, N. Y. "Yonder is a man," said the farmer to a reporter, "who is the talk of this community."

"He is Mr. William Woodman, of South Hamilton, Madison Co., N. Y.," a well-todo farmer, who is well known and stands high for honesty and thrift in this neigh-

borhood.
On the following day the newspaper man called on Mr. Woodman in his comfortable, old-fashioned farm house.
"I have had serious thoughts of writing an account for the newspapers myself," said Mr. Woodman, "but as I am not accustomed to such work, I have never attempted it. Sit down and I will tell you all about it.
"I am fifty-nine years old. I contracted

"I am fifty-nine years old. I contracted

customed to such work, I have never attempted it. Sit down and I will tell you all about it.

"I am fifty-nine years old. I contracted rheumatism when only fourteen years of age, then a severe cold from over exertior and from becoming over heated. My father was a farmer and insisted that the only way to make me strong was to do plenty of hard work. When, however, he saw me helpless in bed for six long months without being able to move except with help, he changed his mind, and forever after believed that children should not be made to do men's work. My growth was stopped by suffering, and I do not think I am an inch taller than that day, forty-five years ago. During the forty years ensuing after my misfortune, I was attended by seven doctors. I received temporary relief at times, from new forms of treatment, but always relapsed into a worse and more aggravated condition. The conclusion of all these gentlemen was that I was incurable, and all they could do was to ease my condition. After I grew to manhood I married and have been blessed with a family. My dear wife has had all the drudgery of nursing and waiting upon me, and the burden has been indeed hard to bear.

"Without hope from physicians I began to take Dr. Williams' Pink Pills, which was highly recemmended by my friends. I took them and within one week began to feel better than I had since I was first afflicted. I took these pills according to directions, and when the box was nearly gone I went over to Brockfield to an old friend who was in the drug business, named Dr. Aurelius Fitch, who likewise was a great sufferer from rheumatism. The doctor and I ordered several boxes of Pink Pills in partnership, he from that time keeping them on sale. Well, I continued to take them according to directions for the next three years and steadily improved, gaining flesh and strength, until two years ago I was able bodied a man of my years as you will find. I ought to tell you that after I ordered the first box of pills the physician who was then attending me came in a cured, and in every case they have been effective, not only in rheumatism but in numerous other disorders, especially impoverishment of the blood, heart trouble and kidney disease.

"I certify the above statement to be true, and if necessary will swear to the same be-

and if necessary will swear to the same be-fore a Notary Public."
WILLIAM WOODMAN. WILLIAM WOODMAN.

When Mr. Woodman had signed and delivered the above paper to the reporter, he
said: "If I were you I would go and call on
Mr. Amos Jaquays, at Columbus Centre, to
whom I recommended Dr. Williams' Pink
Pills for aggravated kidney disease. He is
now in perfect health. I have no doubt he
will be glad to testify to the efficacy of the
remedy that sured him."

remedy that cured him."
Dr. Williams' Pink Pills contain all the Dr. Williams' Pink Pills contain an the elements necessary to give new life and richness to the blood and restore shattered nerves. They are for sale by all druggists, or may be had by mail from Dr. Williams' Medicine Company, Schenectady, N. Y., for 50c. per box, or six boxes for \$2.50.

An Odd Brida! Tour.

The story of one of the strangest bridal tours ever taken is told by the St. Paul Globe. Mr. and Mrs. Clarence Berry started for Alaska immedietely after their marriage, and have spent the last eighteen months in the inhospitable region, searching for gold. They were unsuccessful at first, but afterward hearing of gold in Klondyke, they went there, and have now returned to St. Paul rich. Mrs. Berry herself picked up \$10,000 during the the season. She is in excellent health, weighing twenty-two pounds more than when she left, although she has endured many hardships.

"I would advise all women who contemplate going to the Klondyke," Mrs. Berry said, "to provide themselves with the warmest clothing possible. I carried with me four suits of extra heavy flannel underclothing and stockings. It is essential that one's footwear be near perfection as possible. I wore heavy woolen stockings all winter, and my other dress was in keeping. I would not advise any one to take the journey this fall. There will unquestionably be great suffering among the miners already there, and if a thousand more prospectors go in there is no telling how great the misery will be,'

300000000000000

The Blue and the Gray.

blue, when the gray hairs begin to show. It's

a very natural feeling. In the normal condition

of things gray hairs belong to advanced age.

They have no business whitening the head of

man or woman, who has not begun to go

down the slope of life. As a matter of fact,

the hair turns gray regardless of age, or of

life's seasons; sometimes it is whitened by

sickness, but more often from lack of care.

When the hair fades or turns gray there's no

need to resort to hair dyes. The normal color

of the hair is restored and retained by the use of

TRAIN ORDERS MISCARRIED.

AS A RESULT A DISASTROUS COL-LISION TOOK PLACE.

MANY PASSENGERS WERE KILLED

Death List May Reach Fifteen-Boilers of Three Engines Burst and Wreck Takes Fire,

One of the worst wrecks in the history of the Santa Fe railroad occurred three miles east of Emporia, Kan., at about 8:30 o'clock Wednesday night. Twelve or fifteen persons were kill-

ed and as many more badly hurt. The fast mail train going east and the Mexico and California express bound west collided head-on. The Mexico and California express was pulled by two locomotives, and when they struck the engine drawing the fast mail, the boilers of all three engines exploded and tore a hole in the ground so deep that the smoking car of the westbound train ran on top of the three engines and two mail cars and balanced there without turning

The passengers in the smoking car escaped through the windows. The front end of this car was enveloped in a volume of stifling smoke and steam, belching up from the wreck below, and the rear door was jammed tight in the wreck of the car behind.

The wreck caught fire from the engines. The cars in the hole and the smoker burned to ashes in a short

In climbing out of the smoking car several men fell through the rifts into the wreck below, and it is impossible to tell whether they escaped or were burned to death. The westbound train carried seven or eight coaches, and its passengers included many excursionists, who had been to hear Hon. W. J. Bryan speak at the county fair at Burlington.

Mr. Bryan himself was on the train, and helped to carry out the dead and wounded and gave the greatest attention to their care.

The engineer of the westbound train had received orders to meet the fast mail at Emporia, and was making up lost time. These two are the fastest trains in the Santa Fe system and the westbound train must have been running at a speed of at least forty miles an liour. The westbound express was going around a slight curve and met the fast mail probably within 200 feet. Of the seven or eight cars making up the Mexico and California express only the mail, baggage, express and smoking cars were destroyed. The coach following the smoker was badly splintered.

There were not more than a dozen passengers on the fast mail, all in on coach, and while none of them are seriously injured, their shaking up was terrible. Every seat in the coach was torn from the floor and many floor planks came up with the seats.

It is stated that the wreck was causd by a miscarriage of orders from the trainmaster.

At Emporia the eastbound fast mail train received orders to pass the California express at Land, seven miles

Another order was sent to Land for the California express to take the siding there, but this order was not delivered, and the westbound train passed on, the trainmen expecting to pass the fast mail at Emporia.

HANNA'S MONETARY COMMISSION.

Nine Out of Eleven Members Accept Appointment.

H. H. Hanna, chairman of the exscutive committee of the monetary convention that met in Indianapolis last January, announced Wednesday afternoon that nine of the eleven members of the monetary commission that were to be chosen have accepted and authorized the publication of their names.

The following are the names of those who have accepted: George F. Edmunds, Vermont; Charles S. Fairchild, New York; S. Fish, New York; Stewart Patterson, Pennsylvania; T. G. Bush, Alabama; J. W. Fries, North Carolina; W. B. Dean, Minnesota; George E. Leighton, Missouri; Robert S. Taylor, Indiana.

YOUNG MEN DROWNED.

They Were Rocking a Boat and Caused It to Capsize.

A Detroit special says: Six young men were drowned from a yacht near Wind Mill Point, in Lake St. Clair, late Wednesday afternoon.

A party of ten chartered the yacht Blanche B. and went up the lake. When near the mouth of Fox creek and nearly off Wind Mill Point, three of the party climbed out on the boom and commenced to rock the craft, which being heavily ballasted, lurched over and capsized, going to the bottom. Six men who were in the cockpit were drowned.

The three youngsters who caused the disaster and one other were saved. SOUTHERN CASE IS POSTPONED.

The Date of Hearing Has Been Changed to November.

A special from Macon, Ga., says: The case against the Southern railway brought by merchants of Macon to test the validity of the combination, will be postponed from October to some date in November.

Senator Edmunds is employed in the supreme court at the time the case was set and Judge Speer has notified counsel to that effect.

SOUTHERN PROGRESS.

Industries Established in the South During the Past Week.

Though the fall season has not fairly opened yet, southern correspondents report a large increase in trade. The demand for all manufactured products is active, and the mills that closed down during the dull season to curtail production have nearly all resumed operations.

The iron market is strong and sales are increasing with advancing prices. The Tennessee Coal, Iron and Railroad Company have advanced schedule prices on pig iron 25 cents per ton and report a \$50,000 sale of pig iron. Southern iron is in active demand and the outlook is very encouraging.

The lumber and textile industries show a corresponding increase in business, and some cotton mill companies, though running day and night, are still behind with orders.

Among the new industries reported for the week are the following: An electric light plant at Terrell, Tex.; flouring mills at Concord, N. C., and New Market, Va.; the American Mining and Exploration company, capital \$200,000, at New Orleans, La.; the Mott Petroleum company, capital \$150,-000, Charleston, W. Va.; the Southwestern Production company, capital \$30,000, Parkersburg, W. Va., to develop oil and gas property, and a knitting mill at Bronwood, Ga. Wood-working plants will be established at Crestview, Fla.; Louisville and Uniontion, Ky.; Earlybranch and Sumter, S. C.; Trimble, Tenn.; Lewisville, Tex., and East Radford, Va. - Tradesman (Chattanooga, Tenn).

GENERAL AVERY DEAD.

He Was Prominent In Georgia Affairs For Thirty Years.

General Isaac W. Avery, a prominent Georgian, died Wednesday afternoon at his home in Edgewood, a suburb of Atlanta, from the effects of a fall which he sustained the night be-

Isaac Wheeler Avery was born at St. Augustine, Fla., May 2, 1837. His father traced his lineage to the English kings.

In 1861 he aided in the capture of Fort Pulaski, and voluntéered as a private in the first company of the war in the Eighth Georgia regiment, and served to the end of the struggle. He was in the Bull Run battle and

was successively promoted to the rank of captain, major, lieutenant colonel and colonel of cavalry in the west, commanding a brigade the last year.

Just before the surrender he was made brevet brigadier general, but in the excitement and turmoil of the closing days failed to receive his commission. In the opinion of military men, however, he was entitled to that rank, and during the last years of his life he was known as General Avery, although with characteristic modesty he never claimed the title.

THE LIST OF DEAD.

Frightful Record of the Head-End Collision on Santa Fe.

Twelve known dead, one missing and probably incinerated and fourteen injured, two of whom will likely die, is the record of the terrible head-end collision on the Santa Fe so far as known. The first lists were mixed because

of the confusion attending the wreck. It is not positively known that the list given is complete, as it is believed that several were burned to death and and nothing left by which they could be recognized.

The bodies of eleven were found in the debris, three burned beyond recog-Nothing could be found of the re-

mains of Wells-Fargo Express Messenger J. F. C. Sauer. A handfull of charred bones taken from the wreck, however, are supposed to be his. Near them were found his watch.

TO MARK GRAVES

Of Confederate Soldiers Buried From Northern Prisons During the War. The preliminary arrangements toward marking the graves of confederate soldiers who are buried from northern prisons have been made by a joint committee from Lee camp, the Daughters of the Confederacy and the Sons

of Veterans, at Richmond, Va.

At a meeting of this body Thursday night a sub-committee was appointed to select the places at which monuments shall be erected.

RECEPTION TO M'KINLEY

By Enthusiastic Citizens of the Town of Somerset, Pa.

President McKinley was given a public recedition at Somerset, Pa., Thursday evening. The crowd present numbered nearly 3,000, and as many people gathered in front of the Ensley residence, where the presidential party were serenaded. tial party were serenaded.

President McKinley appeared on the

porch, and in a five minutes' talk thanked the band and the crowd for the serenade, and then introdued Governor Lloyd Lowndes, of Maryland, who was to spend the night as the guest of Mr. Abner McKinley. The governor spoke in a happy vein for ten minutes.

GAGE WORKING ON REPORT.

Bureau Chiefs Are Requested to Make

Their Statements Earlier. A Washington dispatch says: Secretary Gage is at work on his annual report. He had instructed the bureau chiefs to make their indvidual reports a month or six weeks earlier than has been customary in the past. That of Comptroller Tracewell, which was the first to be submitted, was laid before the secretary Wednesday. Echo to Measure Distance.

A most interesting method of employing the echo of a sound has been devised for the location of the carriers which sometimes lodge in the under-ground pneumatic tubes. Knowing that sound travels at a speed of, roughly, 1,100 feet per second, and knowing the time measured in thousandths of a second between the firing of a pistol shot in the conduit and the arriving of the echo at the outlet of the tube, a simple calculation gives the exact location of the obstruction. The means of five experiments in the recent test gave 2,793 seconds, and when the sound velocity was corrected for air temperature, the obstruction was located at 1,537 feet from the instrument, which was the exact location .-

A Lesson in Economy. A story is told of the late Baron Hirsch that conveys a valuable lesson. After writing a message announcing the gift of a fortune to a school, the great millionaire went over the telegram carefully a second time, condensing it so as to save a franc.

Life Isn't Worth Living

to one who suffers the maddening agony of Eczema, Tetter and such irritating, itching skin diseases. Every roughness of the skin from a simple chap to Tetter and Ringworm even of long standing is completely, quickly and surely cured by Tetterine. Is comfort worth 50 cents to you? That's the price of Tetterine at drug stores, or by mail for price in stamps from J. T. Shuptrine, Savannah, Ga.

AN OPEN LETTER

From Miss Sachner, of Columbus, O., to Ailing Women.

To all women who are ill:-It affords me great pleasure to tell you of the benefit I have derived from taking Lydia E. Pinkham's Vegetable Compound. I can hardly find words to express my gratitude for the boon given to suffering women in that excellent remedy. Before taking the Compound

I was thin. sallow, and nervous. I was troubled with leucorrhœa, and my menstrual periods were very irregular. I

tried three physicians and gradually grew worse. About a year ago I was advised by a friend to try Mrs. Pinkham's Sanative Wash and Vegetable Compound, which I did. After using three bottles of the Vegetable Compound and one package of Sanative Wash, I am now enjoying better health than I ever did, and attribute the same to your wonderful remedies. I cannot find words to express what a Godsend they have been

Whenever I begin to feelnervous and ill, I know I have a never-failing physician at hand. It would afford me pleasure to know that my words had directed some suffering sister to health and strength through those most excellent remedies .- MISS MAY SACHNER, 348 % E. Rich St., Columbus, O.

The result obtained from the use of our machine has been so very satisfactory that we enter upon our TMIRD SARSON with a feeling of great confidence. Our machines are durable and thoroughly effective. The ground kernels are left in a fine condition for distributing as a fertilizer. The hulls are valuable food for cattle. Descriptive pamphlet with testimonials from prominent cotton planters throughout the Southern States, together with simple of product from our machine, will be lorwarded on application.
